

How to Certify Multiple Technicians on a Single Demo Unit

Goal:

Each technician understands all aspects of hardware installation and software configuration.

Solution:

1. Company orders one RC-04-PRX-WK Demo Kit.
2. Each technician needs to register and begin training: <https://isonas.docebosaas.com/lms/>
3. Initial purchaser/technician provides Company Name & Time Zone to ISONAS Sales Team, allowing us to create the Pure Access Demo Tenant.
4. Tech 1 Registers Demo Software with License Key provided via email @ isonaspureaccessdemo.com
5. Tech 1 completes the training, submits their results, and passes the exam.
6. Upon completion, Tech 1 deactivates all users, access points and unwires Demo Kit to allow the next technician to begin.
7. Tech 1 creates a new user for Tech 2 giving them administrator privileges and grants them web access so they may login and complete their final exam exercises.
8. Tech 2 completes the training & submits the final exam.
9. Repeat as needed.
